Round Condensed is characterized by its narrow proportions, while staying faithful to Round's essence, where round letters retain their size. As for Round, the circular shapes are crossed by straight strokes, giving the typeface a subtle balance between fluidity and geometrical structure. The lowercase "b"; "d"; "q"; "o" and the capitals "O" and "Q" follow these rules. Every other character is condensed, which enhances the presence of round letters. They stand out even more.

Designed to work in a perfect complementarity with Round, Round Condensed shares the same number of styles and weights. The round letters stay strictly the same in both families; the only difference resides in the metrics. Their compatibility enhances the possibilities of creation; it offers dynamic composition insights between body and display texts.

If Round is perfect for text, Round Condensed excels in display size. Thought for titles, editorial design or visual identities, it expands your typographic compositions with a graphic presence that is not to be forgotten.

Ligatures are a more harmonious design for some letter combinations. Standard ligatures are activated by default whereas discretionary ones can be activated on the OpenType panel.

Standard ligatures

**Il fit un sifflement
effroyant**

**Il fit un sifflement
effroyant**

Discretionary ligatures

**Théâtre
www.bureaubrut.com**

**Théâtre
www.bureaubrut.com**

When activating the “small caps” option, lowercase letters will be transformed in small capitals and lining figures in oldstyle figures. You can also access the “all small caps” option on the OpenType panel that will also transform uppercase letters. The height and spacing of the punctuation is automatically adapted when you select the “all caps” or “small caps” option.

Lowercase in small caps

**Monsieur
le Président**

**MONSIEUR
LE PRÉSIDENT**

“All small caps” option

**Monsieur
le Président**

**MONSIEUR
LE PRÉSIDENT**

Case sensitive punctuation

**¿ No ? (Yes)
« Peut-être »**

**¿ NO ? (YES)
« PEUT-ÊTRE »**

An alternate slashed zero is available for all sets.

The default setting for figures is the lining set.

Tabular figures have an identical width and are useful for the composition of charts.

You can access the others sets on the OpenType panel. Height corrected currency and mathematical symbols are automatically activated on all sets of figures.

Titling Alternates.

This feature replaces accented capitals with
stacked accents, better suited for large sizes,
such as in title compositions with tight leading.

Stacked capitals

LE CŒUR DÉÇU
MAIS L'ÂME
PLUTÔT NAÏVE

LE CŒUR DÉÇU
MAIS L'ÂME
PLUTÔT NAÏVE

Some fractions are build-in glyphs but the fraction option can transform any two series of numbers separated by a slash into a fraction. You can also access the numerators and denominators options separately.
